

[Mario Minor Release \(September 11th, 2021\)](#)

Here are the highlights from the Mario Minor release:

- **eForm Enhancements**
 - Preview Feature – Users can now preview the in progress eForm changes while working in the create/edit mode in the form builder
 - New Icons – Replaced the links on the top of the form builder with new set of icons (Preview, Save, Add Data Element etc.)
 - New Legends – Replaced the old legends, with new set of legends (Linked, Required, Validation required etc.)
 - Cosmetic fix to align the input text box and the question label so that they both are in the same horizontal line next to each other
- **Accounts Module**
 - Account Group List – Increased the character count for the Description field so that the admins/Ops can enter additional language/description under this field
- **Study Repository/Meta Study**
 - GOS-E Extra Validation Rules – The extra-validation algorithm for this Form Structure needed to be adjusted for which the dev team had to rewrite the entire extra validation code for this form structure
- **Miscellaneous Changes:**
 - Refactored the Authentication and Download Tool services to use the multitenant configuration
 - Cleaned up the Jenkins build jobs directory to reduce backup size
