Odin Minor – Release Notes (July 16th, 2022)

- **CASA Code Merge**

  - Merged about 60 changes into BRICS code base from CiSTAR/Casa code base
  - Determined which features should be enabled/disable in our instances and flagged and tested them as needed

- **FITBIR Biosample**
  - Refined the FITBIR Biosample Application on the Public Site
  - Updated the Biosample API and tested the end to end process

- **ProFoRMS**

  - Adjusted spacing between the questions in ProFoRMS and Form Builder
  - Updated the Progress Icons (In Progress, Completed, Locked etc.) in the left panel on the Data Collection pages
  - Removed the "Mark as Completed" checkbox from the Data Collection pages
  - Automation of data submission from ProFoRMS to Repository
    - Locked Data followed by data correction gets automatically resubmitted after the nightly job
    - The old dataset is archived automatically and the new one gets added to the repository

- **Data Repository**
  - Submission Tool - Adjusted Extra Validation Rules for GPT, AUDIT-C & AUDIT_FITBIR Form Structures

- **Query Tool**
  - PDBP Only - Added the capability for non admins to view the unmasked data for certain columns if they have permissions for the study

- **Accounts**
  - Password Update - Updated the max password length

- **Public Site**
  - FITBIR - Continues work on Shiny App Integration on FITBIR Public Site: This would allow us to visualize individual study team's data and display it under their study profile page
  - cdRNS – Fixed a few 508 compliance issues on the public site

- **Technical Upgrades**
  - Upgraded the CXF Library
  - Upgraded the remaining JQuery Tables
  - Migrated Data Repository Files from SFTP to File Repository
